Career Objective

Motivated B.Tech Artificial Intelligence & Data Science student with knowledge of Python, C, SQL, and web technologies. Seeking internship opportunities to apply technical skills, gain industry experience, and contribute to innovative software and AI-driven projects while continuing to learn and grow as a developer.

Projects

Agentic AI for Smart Village Issue Management

- Developed an AI-powered platform that helps communities report, organize, and prioritize public infrastructure issues such as water supply, road maintenance, and electricity outages.
- Built an intelligent prioritization system that assigns higher urgency to critical issues.
- Designed a live village heatmap for visualizing issue distribution and identifying high-priority areas.
- Utilized Python, HTML, and CSS to create a user-friendly interface and workflow.
- Collaborated during a hackathon to develop and present the solution within a limited timeframe.

Technical Skills

Strongest Areas	Python, SQL
Programming Languages	Python, C
Database	SQL
Platforms	Git, GitHub, VS Code

Education

Royal College of Engineering and Technology
B.Tech in Artificial Intelligence & Data Science

Thrissur, India
June. 2025 - May. 2029
